

Job Title: Junior Software Developer

Company: Gray Falcon (www.grayfalcon.com)

Location: St. George, UT

Salary: Negotiable

Benefits: Medical & Dental | 401(k)

About Gray Falcon

Gray Falcon is a fast-growing software company dedicated to delivering innovative solutions that drive real impact in the ecommerce brand protection space. We're looking for a motivated **Junior Software Developer** to join our team and contribute to cutting-edge projects in a collaborative, results-driven environment.

Role Overview

As a **Junior Software Developer** at Gray Falcon, you'll work on software development projects, learning from experienced engineers while applying your academic knowledge to real-world applications. The ideal candidate has a strong foundation in computer science principles, a desire to grow, and an eagerness to build scalable and efficient software.

Key Responsibilities

- Develop, test, and debug software solutions under the guidance of senior engineers
- Collaborate with cross-functional teams to design and implement features
- Work with **Python** and **SQL** (preferred experience but not required)
- Maintain & improve existing applications based on feedback & performance metrics
- Gain exposure to **Google Cloud** and **Terraform** for infrastructure management

Requirements

- **B.S. in Computer Science** (required)
- **0-2 years of coding experience** with familiarity with **Python and SQL** (preferred)
- Strong problem-solving skills and attention to detail
- Ability to work independently in a remote environment while collaborating effectively with the team

What We Offer

- **Competitive salary** (negotiable based on experience)
- **Comprehensive benefits package** (medical, dental, 401(k))
- **Mentorship & career development opportunities, including potential for remote**
- **Opportunity to work on impactful projects** in a growing and dynamic company

To apply, send your resume and a brief introduction to dev@grayfalcon.com.
